- Big time saver and really facilitates proper communication among the management, staff and the students.

We are giving here brief details about AIMS Software developed by H.R. Software Solutions Pvt. Ltd. read this carefully.

➤ Registration Management :

Academic/Institute administrators can manage all registrations, one user-friendly, automated software program. From limiting class sizes to automatically creating well parents and students of their statuses, HRSS's AIMS software keeps Academic/Institutes organization efficient with managing information for all students.

➤ Admission Management :

Speedily and efficiently execute the complete Admission process for both new and old students; these students are automatically treated differently based on the provided information. The module manages the complete details about the students and their parents/guardians as their education details, disease, marriage anniversary etc...

➤ MIS Reports:

The Report module is a fundamental module of AIMS which generates numerous reports that includes fee details, student registrations, Student admissions, classes, Due Fee, weekly collection, monthly collection & Fine's reports and many more.

➤ Fee Management:

The Fee Management Module of AIMS is one of the most automated fee collection module available in the market. Apart from being automated it is, at the same time, flexible, enough to accommodate the varying nature of the fee most of the academic institutions come across.

The module automatically calculates the pending fees, fine fee, payment details, deduction and concessions, if any applicable to the selected student & allows paying through any mode of payment as cash/check/draft by student wise/class wise & section wise.

AIMS

(Academic Information Management System)

► Control Panel:

- Access right at module and function level allow for control and accountability.
- **Create Users:** It can be Create & maintain according to profile.
- **Users Group:** It can be uses among a group of employees in a single time.
- **User's Right:** Administration allows an admin to have full control on delegation of authority to the various employees so that their domain of operation may be restricted to their own department only. No employee is able to see/edit/modify the information that is not pertinent to his/her role in the organization. This acts as a great management tool and allows authorities to have direct control over the employees' access to the software and to the College/Institute's information resources in general.

Change Password: Multiple user can be use their separate password and also change the password of logging software.

► Utilities:

Set alerts for you to take action an scheduled times like birthday reminders, Parents anniversary, important meeting reminders, event calendars (an event which will be take place on a particular date either in a year or in a month) and data base backup & restore.

► Multi-user work over LAN:

This software based on client; server & software run by multi-user (LAN) in a single time. A class of Multi-users work over LAN where processing is distributed among one or more information requesters (clients) and one or more information providers (servers), as well as in the interfaces (network, protocols, middle-ware) between them. Client/Server include both two-tier, where clients talk directly to servers and three-tier where a third software component provides interfaces services between the clients and the servers.
