## Utilities

Set alerts for you to take action an scheduled times like pending reminders, anniversary, important meeting reminders, event calendars (an event which will be take place on a particular date either in a year or in a month), feedback for client and data base backup & restore

### ❑ Control Panel

Access right at module and function level allow for control and accountability.

- ❖ Create Users: You can be create users by the software
- ❖ Users Group: It can be uses among a group of employees in a single time.
- ❖ User's Right: Administration allows an admin to have full control on delegation of authority to the various employees so that their domain of operation may be restricted to their own. No employee is able to see/edit/modify the information that is not pertinent to his/her role in the organization. This acts as a great management tool and allows authorities to have direct control over the employees' access to the software and to the Hospital's information resources in general.
- ❖ Change Password: Multiple users can be using their separate password and also change the password of logging software.
